We at Opelika Animal Hospital are interested in your pet's **total health**. The fact that you are here for your pet's annual vaccinations is an indication to us that you are interested in the same thing.

As a yearly health update, we give your pet vaccination boosters against contagious diseases, we check for various intestinal parasites and we give him/her a check-up to see if we can detect any obvious ailments or problems.

Our yearly check-ups are in many ways similar to the check-up your own physician gives you. Your doctor listens to you as you speak to him about any problems you might be experiencing. Because your pet can not tell us how he/she feels, we have found that with our **blood screening**, we are able to identify those issues your pet may be experiencing but is unable to express as well as hidden problems that could become **life threatening**. This comprehensive **blood screening** not only shows us what is currently going on with your pet's vital organs, it also offers a base-line for exams in the future. **The blood profile is vital to the health of your pet. Blood tests can prevent critical illness or even death of your pet!**

Blood profile for pets under 6 years = \$77.56.

Blood profile for pets 6 years and over = \$106.65

When providing your pet with a health care check-up, you will be helping your pet to enjoy a more fulfilling, healthy lifestyle.

_____ I approve the yearly blood profile for my pet.

_____ I decline the yearly blood profile recommended for my pet's health.

Sign: _____ Date: _____

*Because our pets age approximately 7 years to our 1 year, this is like us getting a blood profile every 7 years!
